销售模块 数据字典（sales）

说明：本文件由系统导出，部分字段业务含义尚未补充，请以数据库为准。

Countryregioncurrency (sales.countryregioncurrency)

表说明：Cross-reference table mapping ISO currency codes to a country or region.

字段 Field	类型 Type	可空	说明 Remarks
countryregioncode	character varying(3)	否	ISO code for countries and regions. Foreign key to CountryRegion.CountryRegionCode.（主键；外键→countryregion.countryregioncode）
currencycode	character(3)	否	ISO standard currency code. Foreign key to Currency.CurrencyCode.（主键；外键→currency.currencycode）
modifieddate	timestamp without time zone	否	

Creditcard (sales.creditcard)

表说明：Customer credit card information.

字段 Field	类型 Type	可空	说明 Remarks
creditcardid	integer	否	Primary key for CreditCard records.（主键）
cardtype	character varying(50)	否	Credit card name.
cardnumber	character varying(25)	否	Credit card number.
expmonth	smallint	否	Credit card expiration month.
expyear	smallint	否	Credit card expiration year.
modifieddate	timestamp without time zone	否	

Currency (sales.currency)

表说明：Lookup table containing standard ISO currencies.

字段 Field	类型 Type	可空	说明 Remarks
Currencycode	character(3)	否	The ISO code for the Currency.（主键）
Name	character varying(50)	否	Currency name.
Modifieddate	timestamp without time zone	否	

CURRENCYRATE (sales.currencyrate)

表说明：Currency exchange rates.

字段名	数据类型	可空	字段说明
Currencyrateid	integer	否	Primary key for CurrencyRate records.（主键）
Currencyratedate	timestamp without time zone	否	Date and time the exchange rate was obtained.
Fromcurrencycode	character(3)	否	Exchange rate was converted from this currency code.（外键→currency.currencycode）
Tocurrencycode	character(3)	否	Exchange rate was converted to this currency code.（外键→currency.currencycode）
Averagerate	numeric	否	Average exchange rate for the day.
Endofdayrate	numeric	否	Final exchange rate for the day.

字段名	数据类型	可空	字段说明
Modifieddate	timestamp without time zone	否	待补充

销售-customer (sales.customer)

表说明：Current customer information. Also see the Person and Store tables.

Column	Type	Nullable	Description
CUSTOMERID	integer	否	Primary key.（主键）
PERSONID	integer	是	
STOREID	integer	是	Foreign key to Store.BusinessEntityID（外键→store.businessentityid）
TERRITORYID	integer	是	ID of the territory in which the customer is located. Foreign key to SalesTerritory.SalesTerritoryID.（外键→salesterritory.territoryid）
ROWGUID	uuid	否	待补充
MODIFIEDDATE	timestamp without time zone	否	待补充

Personcreditcard (sales.personcreditcard)

表说明：Cross-reference table mapping people to their credit card information in the CreditCard table.

字段 Field	类型 Type	可空	说明 Remarks
Businessentityid	integer	否	
Creditcardid	integer	否	
Modifieddate	timestamp without time zone	否	

SALESORDERDETAIL (sales.salesorderdetail)

表说明：Individual products associated with a specific sales order. See SalesOrderHeader.

字段 Field	类型 Type	可空	说明 Remarks
SALESORDERID	integer	否	
SALESORDERDETAILID	integer	否	
CARRIERTRACKINGNUMBER	character varying(25)	是	
ORDERQTY	smallint	否	Quantity ordered per product.
PRODUCTID	integer	否	
SPECIALOFFERID	integer	否	
UNITPRICE	numeric	否	Selling price of a single product.
UNITPRICEDISCOUNT	numeric	否	Discount amount.
ROWGUID	uuid	否	
MODIFIEDDATE	timestamp without time zone	否	

SALESORDERHEADER (sales.salesorderheader)

表说明：General sales order information.

字段 Field	类型 Type	可空	说明 Remarks
SALESORDERID	integer	否	Primary key.（主键）
REVISIONNUMBER	smallint	否	Incremental number to track changes to the sales order over time.

字段 Field	类型 Type	可空	说明 Remarks
ORDERDATE	timestamp without time zone	否	Dates the sales order was created.
DUEDATE	timestamp without time zone	否	
SHIPDATE	timestamp without time zone	是	Date the order was shipped to the customer.
STATUS	smallint	否	Order current status. 1 = In process; 2 = Approved; 3 = Backordered; 4 = Rejected; 5 = Shipped; 6 = Cancelled
ONLINEORDERFLAG	boolean	否	0 = Order placed by sales person. 1 = Order placed online by customer.
PURCHASEORDERNUMBER	character varying(25)	是	Customer purchase order number reference.
ACCOUNTNUMBER	character varying(15)	是	Financial accounting number reference.
CUSTOMERID	integer	否	Customer identification number. Foreign key to Customer.BusinessEntityID.（外键→customer.customerid）
SALESPERSONID	integer	是	Sales person who created the sales order. Foreign key to SalesPerson.BusinessEntityID.（外键→salesperson.businessentityid）
TERRITORYID	integer	是	
BILLTOADDRESSID	integer	否	
SHIPTOADDRESSID	integer	否	
SHIPMETHODID	integer	否	
CREDITCARDID	integer	是	Credit card identification number. Foreign key to CreditCard.CreditCardID.（外键→creditcard.creditcardid）
CREDITCARDAPPROVALCODE	character varying(15)	是	Approval code provided by the credit card company.
CURRENCYRATEID	integer	是	
SUBTOTAL	numeric	否	Sales subtotal. Computed as SUM(SalesOrderDetail.LineTotal)for the appropriate SalesOrderID.
TAXAMT	numeric	否	Tax amount.
FREIGHT	numeric	否	Shipping cost.
TOTALDUE	numeric	是	
COMMENT	character varying(128)	是	Sales representative comments.
ROWGUID	uuid	否	
MODIFIEDDATE	timestamp without time zone	否	待补充

Salesorderheadersalesreason (sales.salesorderheadersalesreason)

表说明：Cross-reference table mapping sales orders to sales reason codes.

Column	Type	Nullable	Description
SALESORDERID	integer	否	
SALESREASONID	integer	否	Primary key. Foreign key to SalesReason.SalesReasonID.（主键；外键→salesreason.salesreasonid）
MODIFIEDDATE	timestamp without time zone	否	待补充

Salesperson (sales.salesperson)

表说明：Sales representative current information.

字段名	数据类型	可空	字段说明
businessentityid	integer	否	Primary key for SalesPerson records. Foreign key to Employee.BusinessEntityID（主键；外键→employee.businessentityid）
territoryid	integer	是	
salesquota	numeric	是	Projected yearly sales.
bonus	numeric	否	Bonus due if quota is met.
commissionpct	numeric	否	Commision percent received per sale.
salesytd	numeric	否	Sales total year to date.
saleslastyear	numeric	否	Sales total of previous year.
rowguid	uuid	否	
modifieddate	timestamp without time zone	否	待补充

Salespersonquotahistory (sales.salespersonquotahistory)

表说明：Sales performance tracking.

Column	Type	Nullable	Description
BUSINESSENTITYID	integer	否	
QUOTADATE	timestamp without time zone	否	
SALESQUOTA	numeric	否	Sales quota amount.
ROWGUID	uuid	否	待补充
MODIFIEDDATE	timestamp without time zone	否	

Salesreason (sales.salesreason)

表说明：Lookup table of customer purchase reasons.

字段名	数据类型	可空	字段说明
SALESREASONID	integer	否	
NAME	character varying(50)	否	
REASONTYPE	character varying(50)	否	
MODIFIEDDATE	timestamp without time zone	否	

销售-salestaxrate (sales.salestaxrate)

表说明：Tax rate lookup table.

字段名	数据类型	可空	字段说明
SALESTAXRATEID	integer	否	Primary key for SalesTaxRate records.（主键）
STATEPROVINCEID	integer	否	State, province, or country/region the sales tax applies to.（外键→stateprovince.stateprovinceid）
TAXTYPE	smallint	否	1 = Tax applied to retail transactions, 2 = Tax applied to wholesale transactions, 3 = Tax applied to all sales (retail and wholesale) transactions.
TAXRATE	numeric	否	Tax rate amount.
NAME	character varying(50)	否	Tax rate description.
ROWGUID	uuid	否	
MODIFIEDDATE	timestamp without time zone	否	待补充

销售-salesterritory (sales.salesterritory)

表说明：Sales territory lookup table.

字段名	数据类型	可空	字段说明
Territoryid	integer	否	
Name	character varying(50)	否	
Countryregioncode	character varying(3)	否	ISO standard country or region code. Foreign key to CountryRegion.CountryRegionCode.（外键→countryregion.countryregioncode）
Group	character varying(50)	否	
Salesytd	numeric	否	Sales in the territory year to date.
Saleslastyear	numeric	否	Sales in the territory the previous year.
Costytd	numeric	否	Business costs in the territory year to date.
Costlastyear	numeric	否	Business costs in the territory the previous year.
Rowguid	uuid	否	
Modifieddate	timestamp without time zone	否	

SALESTERRITORYHISTORY (sales.salesterritoryhistory)

表说明：Sales representative transfers to other sales territories.

Column	Type	Nullable	Description
Businessentityid	integer	否	Primary key. The sales rep. Foreign key to SalesPerson.BusinessEntityID.（主键；外键→salesperson.businessentityid）
Territoryid	integer	否	Primary key. Territory identification number. Foreign key to SalesTerritory.SalesTerritoryID.（主键；外键→salesterritory.territoryid）
Startdate	timestamp without time zone	否	
Enddate	timestamp without time zone	是	
Rowguid	uuid	否	待补充
Modifieddate	timestamp without time zone	否	

Shoppingcartitem (sales.shoppingcartitem)

表说明：Contains online customer orders until the order is submitted or cancelled.

字段名	数据类型	可空	字段说明
Shoppingcartitemid	integer	否	Primary key for ShoppingCartItem records.（主键）
Shoppingcartid	character varying(50)	否	Shopping cart identification number.
Quantity	integer	否	
Productid	integer	否	
Datecreated	timestamp without time zone	否	Date the time the record was created.
Modifieddate	timestamp without time zone	否	

Specialoffer (sales.specialoffer)

表说明：Sale discounts lookup table.

Column	Type	Nullable	Description
Specialofferid	integer	否	Primary key for SpecialOffer records.（主键）
Description	character varying(255)	否	Discount description.
Discountpct	numeric	否	
Type	character varying(50)	否	Discount type category.
Category	character varying(50)	否	Group the discount applies to such as Reseller or Customer.
Startdate	timestamp without time zone	否	Discount start date.
Enddate	timestamp without time zone	否	Discount end date.
Minqty	integer	否	Minimum discount percent allowed.
Maxqty	integer	是	
Rowguid	uuid	否	待补充
Modifieddate	timestamp without time zone	否	

Specialofferproduct (sales.specialofferproduct)

表说明：Cross-reference table mapping products to special offer discounts.

字段名	数据类型	可空	字段说明
specialofferid	integer	否	Primary key for SpecialOfferProduct records.（主键；外键→specialoffer.specialofferid）
productid	integer	否	Product identification number. Foreign key to Product.ProductID.（主键；外键→product.productid）
rowguid	uuid	否	待补充
modifieddate	timestamp without time zone	否	

销售-store (sales.store)

表说明：Customers (resellers) of Adventure Works products.

Column	Type	Nullable	Description
BUSINESSENTITYID	integer	否	Primary key. Foreign key to Customer.BusinessEntityID.（主键；外键→businessentity.businessentityid）
NAME	character varying(50)	否	
SALESPERSONID	integer	是	
DEMOGRAPHICS	xml	是	Demographic informationg about the store such as the number of employees, annual sales and store type.
ROWGUID	uuid	否	
MODIFIEDDATE	timestamp without time zone	否
